***Oath/Declaration***

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56. Rather, the oath or declaration acknowledges the duty to disclose information as defined in 37 CFR 1.56(a).

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cummins (US 2004/0028502) in view of Hermes (USPN 5,282,829).

In reference to claims 1-6, Cummins discloses a surgical fastener comprising: upright leg 10; a deformable base leg 16 having a tissue piercing tip 18. Cummins does not disclose a capillary in the base leg of the surgical fastener. Hermes teaches a surgical fastener having an upright leg 5 and a base leg 3 having a tissue piercing tip 7, wherein the base leg has multiple rupturable capillary defining a reservoir that retains a bonding, medicinal or therapeutic agent (column 5 lines 13-61; column 6 lines 18-33). It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the surgical fastener of Cummins to

have at least one rupturable capillary, since column 5 lines 2-12 states that such a modification provides focal application of a medicine for the purpose of treating a specific region of tissue, while also providing a drug delivery system to a wound for the purpose of speeding up the healing process of the wound.

### *Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations related to the claimed invention.
